- 7-tier or 8-tier heights
- Letter or Legal Sizes
- 36", 42", and 48" width shelving
- 2-7 carriage lengths
- Reference Shelf accessory
- Limited Lifetime Warranty

Space Planning & Accessories

Increase Storage in the Same Space

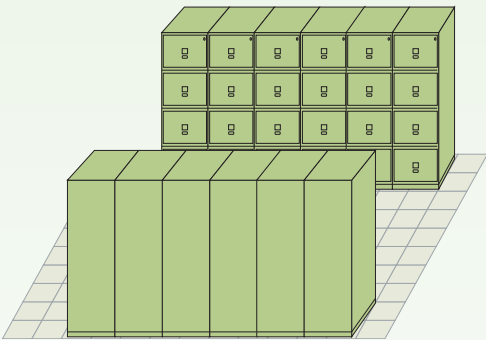

Aurora Side-To-Side Lateral Mobile Systems increase storage without increasing floor space. When compared to other systems such as lateral or vertical filing cabinets, this modular system can actually reduce storage costs and provide room to store more.

Lateral Cabinets

Eight 48" 4-drawer lateral cabinets provide:

- 1,472 Filing Inches
- Use 128 Square Feet of Floor Space

Vertical Cabinets

Twelve 4-drawer file cabinets provide:

- 1,200 Filing Inches
- Use 66 Square Feet of Floor Space

Aurora Side to Side

One Aurora Side-to-Side unit with five 8-tier carriages provides:

- 1,360 Filing Inches
- Uses only 21.6 Square Feet of Floor Space
- Saves Space, or Adds More Storage

Store More

Side-To-Side can handle all letter and legal size documents, office supplies, books, binders, equipment or virtually anything that must be accessed quickly.

Reference Shelf

Handy work surface slides out and stores beneath a shelf.

A Sound Foundation

The deck and rail assembly of the Side-To-Side system provide a safe, heavy-duty foundation that can be adjusted for carpeted, wood, concrete or tiled floors.

Safe Secure Antitip

The stationary shelving unit and the gliding shelving units are linked securely together to prevent shifting or tipping.

Move It Quietly

Durable acetal polymer wheels provide quiet and smooth carriage operation.
